

StatIQ™ ESD Monitoring System

StatIQ™ Band

StatIQ™ Hub

StatIQ™ Dashboard

Customer Need

- Conventional ESD grounding straps hamper mobility and promote lapses in compliance.
- There is a distinct lack of traceable data in the existing approach to electrostatic discharge (ESD) mitigation.

Features

- Measures electrostatic charge on user, resolution equivalent of **10 V** body potential.
- Audible alarms when threshold exceeded or ESD events occur (as low as **100 V** discharge).
- Real time and historic data available for analysis on interactive cloud-based dashboard, including environmental measurements.

Company Info

- Developed by Engineering PhD founders in Southwest Colorado.
- Years of data driven research on electrostatics measurements.
